Green Energy

Energize your workouts and your workday, naturally.

Seems like the world is running on empty. But caffeine and energy drinks aren't the answer. Athletes know the most powerful source of energy comes from oxygen. Or oxygenated blood to be exact.

When your red blood cells are energized with oxygen, you don't feel fatigue, never have post-meal sluggishness, and can perform at your peak first thing in the morning and into the night.

With a unique blend of natural botanicals, Green Energy is designed to help keep your red blood cells flowing freely to deliver plenty of fresh oxygen, and infuse your body with natural energy. With Green Energy, you can power through your workouts and your workday naturally.*

The Good Inside 🛞

Amount Per Serving:

Organic Green Tea Extract 240 mg
Bromelain 2,500,000 PU
Protease (B. subtilis) 40,000 PC
Nattokinase Blend 10,000 FU
Serratiopeptidase Blend 100,000 SPU
Protease (A. oryzae) 20,000 HUT

• Other Ingredients: Vegetable capsule (hypromellose), organic rice concentrate.

A Sticky Problem

- Red blood cells make up approximately one quarter of all the cells in the human body.
- The number one job of red blood cells is to transport oxygen throughout the body.
- Undigested proteins can cause our red blood cells to clump and stick together, causing fatigue.
- When your red blood cells are flowing freely with oxygen, you are more energized!

A Green Solution

- Green Tea: Each capsule is like downing a cup of green tea, known for its thermogenic properties to get your metabolism moving.*
- Proteolytic Enzymes: A powerful combination of plant-based enzymes blasts undigested proteins so your red blood cells are free to flow with energizing oxygen.*

Energy without caffeine?

Most people think you need caffeine or another synthetic stimulant to boost your energy. Yet all those energy drinks do is make you crash and burn.

Get sustained all-day energy with Green Energy. Backed by a 30-day "good inside" guarantee, this blend of botanicals keeps you energized naturally. You can even take one at night and still sleep soundly.*

Doctor Recommended

"You get all the benefits of green tea without the caffeine rush, and proteolytic enzymes that really help oxygen flow through your red blood cells to do whatever the task is—whether athletic performance or just being able to get through a full workday—without getting fatigued."

-Jason Reynolds, D.C.
